

IRLP 0093/*HOTMOVE*/Allstar 48290 Cross Connecting Rules

Making house keeping rule item for this system here due to the fact that we had a individual that was cross connecting to other large hubs or reflectors when the Alaska Morning Net was in progress this has been going on for weeks. Somehow we had to ban the individuals allstar nodes for not having his nodes on stats enabled causing chaos sending out bad IAX packets towards the 2 systems of 29332 and 27133 so we had to ban his nodes permanently for not having an email on QRZ, Stats for his Nodes not enabled and randomly connecting to other nodes that is connecting to the Alaska Morning Net sending Bad IAX Packets and causing chaos on to the network.

So at this time I want to warn people if you have an Allstar Node please be advised that we do not allow other hubs to be cross connected without permission if caught you can be disconnected or blocked and you can be permanently blocked if you do not have an email address on QRZ. So please have an email on QRZ or else we don't have a way to contact you.
